Improving Educational Attainment Is One of the Most Pressing Issues of Our Time

Higher Education Is Increasingly Important To Individual AND Societal Well-Being

Salaries Increase with Educational Attainment

Wage premium by education. Compared to high school graduates, holders of Bachelor's degrees and better have earned a substantial wage premium since the 1990s. (makes no control for full-time or full-year status of workers)

Available Jobs Increasingly Require Higher Education

By 2018, about two-thirds of all employment will require some college education or better.

Attention Only to the Average Masks Differences Across Groups

What Do We Know About How to Improve Higher Education Attainment?

Most of What We Know is Based on “Traditional” Students

Worrisome Trends

**WRONG
WAY**

Trend 1: Stratification of Academic Resources

Potential Improvements in College Readiness?

Trend 2: Shifting Responsibility for Paying College Costs

Increasing Privatization of Higher Education

Trend 5: Increasing Attention to Finding the “Silver Bullet”

Recommendations

(The State of College Access and Completion)

1. **Improve academic readiness for college.**
2. **Improve alignment across and within sectors and levels**
3. **Improve college affordability**
4. **Ensure early knowledge of college and aid**
5. **Adapt approaches to reflect diversity of students, institutions, and state and other contexts**
6. **Collect and use data to monitor college access and completion and refine policies and practices**

The diagram features three orange rounded rectangular boxes arranged in a triangular pattern. The box on the left contains the text 'K12 Education'. The box on the top right contains the text 'Four-Year Degree'. The box on the bottom right contains the text 'Two-Year College'. These boxes are overlaid on a large, light beige arrow that points from the left towards the right, indicating a progression or flow from K12 Education to higher education options.
